

Overview of the EPC CASE STUDY PACKAGE

The EPC Case Study Package is developed for repeating candidates with a valid certificate that do not desire to commit to the full professional programme. Its primary objective is to empower the candidates with the skills required to master the SAICA APC case study assessments. The offering does not focus on the development of critical professional competencies, but rather focuses on helping the candidates in applying and demonstrating those competencies in the context of a case study assessment. Consequently, following the successful completion of the case studies, we will not issue candidates with a certificate of eligibility to sit for the SAICA APC assessment

OUTLINE OF THE EPC CASE STUDY PACKAGE

Registration into the EPC Case Study Package grants candidates to the following:

Exposure to **on the day of the assessment practicalities** to help you better manage challenges

Receive **comprehensive and personalised developmental feedback** on your case studies throughout the programme
